THE WAKE FOREST UNIVERSITY Center for Structural Biology will host the 36th annual Mid-Atlantic Macromolecular Crystallography (MAMC) Meeting on the WFU Reynolda Campus, June 1-3, 2006. Keynote Speakers for the 36th MAMC Meeting will be Prof. Tomitake Tsukihara, Osaka University (Japan) and Prof. Jack Johnson of The Scripps Research Institute, and the 2006 Keynote theme will be "Supramolecular Assemblies." Attendees will include university faculty, graduate students, and postdoctoral fellows, research staff and investigators from both government and industry laboratories, and technical representatives from bioscience companies and vendors.

The 36th MAMC Meeting is supported by a grant from the North Carolina Biotechnology Center, by contributions from the National Institute of Environmental Health Sciences and from both national and international corporate sponsors, and by a host of regional businesses and organizations.

For more information on the 36th MAMC Meeting, and on sponsorship opportunities, please contact:
